

Configurable AI for education businesses

Pilot branded AI-powered student and parent experiences around your existing pedagogy, resources, and operating model - without building an internal AI engineering team.

THE PROBLEM

Education businesses often have strong pedagogy, curriculum, and advising processes - but students need guidance more frequently than staff can manually provide. Parents also want progress visibility without constant staff updates.

THE SOLUTION

LearnerLoop turns an institution's workflow, resources, parent rules, and staff escalation rules into a branded AI-powered student experience.

WHY IT MATTERS

- ✓ **More consistent student follow-through**
- ✓ **Better parent confidence**
- ✓ **More scalable staff support**
- ✓ **Differentiated branded student experience**
- ✓ **Faster AI experimentation without internal engineering**

WHAT LEARNERLOOP CAN POWER

- SAT practice + daily study plans
- AI tutoring + accountability
- Parent progress summaries
- College opportunity discovery
- Admissions roadmap guidance
- Staff escalation + review workflows

FOUNDER-LED PILOT

Early partners work directly with the founder to configure one narrow workflow around their actual operating model. The goal is not a generic software trial. The goal is to test whether LearnerLoop can improve follow-through, parent visibility, and staff leverage in a real education business context.

4-WEEK PILOT STRUCTURE

01 Map workflow

Resources, cases, parent visibility, success metrics

02 Configure

Branded student + parent experience

03 Review

Staff review + pilot group or sample cases

04 Evaluate

Outcomes and next scope

BEST-FIT PILOT PARTNERS

- SAT / test prep academies
- Tutoring centers
- College consulting firms
- English-learning businesses
